Customer Reviews

This came as described - okay condition, only the first three chapters were highlighted. I came with the CD as stated which actually had not been opened at all! Difficult to navigate through the CD however, I'm using it to study for my boards and I don't have time to figure out how to find specific pictures.

as described. A little more dog-eared than I hoped and highlighted in blue. CD not great but maybe it never was (on a MAC).
