Alexander's Surgical Procedures, 1e

Synopsis

Developed specifically for surgical technologists, Alexander's Surgical Procedures provides proven, step-by-step coverage of essential surgical procedures from one of the most trusted sources in surgical technology. Building on the renowned content of Alexander's Care of the Surgical Patient, 14th Edition, respected authorities Jane Rothrock and Sherri Alexander (AST president 2007 - 2011) guide you through the pre-op set up, procedure pathology/steps, and post-op considerations for all required procedures. This approachable, easy-to-use resource complements the fundamental coverage in your other surgical technology textbooks, and detailed procedure videos on a companion Evolve website help you ensure success from the classroom to the OR. Content adapted from Alexander's Care of the Surgical Patient, 14th Edition provides comprehensive procedural coverage optimized for your specific needs as a surgical technologist. Surgical Technologist Considerations boxes detail practical strategies for applying chapter content to specialty procedures. Complete pre-op set up, draping, and other instructions for each procedure equip you to confidently perform all of the duties of surgical technologist in the OR setting. Chapter Outlines, Learning Objectives, and Chapter Summaries help you study chapter content more effectively. Review questions in the text and case studies on Evolve reinforce key concepts and encourage critical thinking. OR Live links on Evolve direct you to step-by-step procedure videos for commonly performed procedures. More than 700 full-color illustrations clarify surgical anatomy, instrumentation, procedures, and methods. Surgical Pharmacology tables provide quick, convenient access to generic/trade names, purpose/description, and pharmacokinetics for drugs most commonly associated with each specific surgical procedure. Cutting-edge content reflects the latest interventions and patient care techniques in surgical practice. Geriatric Consideration boxes help you manage surgical challenges unique to geriatric patients. Patient Safety boxes alert you to recent Joint Commission safety initiatives to ensure safe performance of key tasks. History boxes present chapter content in a broader context to enhance your understanding and retention. Ambulatory Surgical Considerations boxes highlight important changes to patient care within appropriate procedures. Risk Reduction Strategies boxes provide specific steps you can take to improve patient safety.

Book Information

Hardcover: 944 pages

Publisher: Mosby; 1 edition (September 26, 2011)

Language: English

ISBN-10: 032307555X

ISBN-13: 978-0323075558

Product Dimensions: 8.8 x 1.6 x 11.1 inches

Customer Reviews

As a surgical technology student, I was excited to find this book on . (I already own a copy of Alexander's Care of the Patient in Surgery, but I thought a book geared towards surgical technologists would be especially helpful). I ordered it immediately. It came in today, so I sat down with my copy of Care of the Patient and compared the two. I was extremely disappointed to see that they are nearly identical. CotP has more info overall. This book, Surgical Procedures, leaves out some of the surgical pharmacology information and changes the "Perioperative Nursing Considerations" in each chapter to "Surgical Technologist Considerations" which contains most of the same info, word-for-word, but leaves out details of patient monitoring, preoperative patient preparation, etc. It also leaves out "Sample Plan of Care" tables found in CotP. It does contain about one page per chapter of photos of surgical instruments that the nursing version does not contain, but the pictures are too small to see any details and be of much help. (There are already numerous photos of instruments in the nursing book). All the operative procedure descriptions are the same, with occasional re-wording on some of the steps. The only things I can see in the Surgical Procedures book that the other book doesn't have is Surgical Technology Preference Cards (which are pretty much very generic lists for supplies typically used for any procedures in a particular specialty- hemostatic agents, drapes, drains and dressings- and never mentions any particular kinds for specific procedures) and at the end of each chapter is a short review of about 10-20 questions. If you already have a copy of Alexander's Care of the Patient In Surgery, then this is a waste of money.
